## EAGLE LOCK PALLET RACK AND ENGINEERED SYSTEMS

Setting the Standard  
for Building Safety™

# Eagle Lock Pallet Rack

## Built Stronger to Last Longer

Eagle Lock pallet rack utilizes the same standard teardrop design that is favored by most pallet rack users, but we didn't stop there. We use a closed tube design throughout our system to create a pallet rack that is 20% stronger than the competition. Our beams are also a closed tube with an integral step for any decking option. Our automatic beam locks are replaceable to avoid unwanted beam replacement due to damaged locks. In addition, Eagle Lock rack is interchangeable with all major teardrop rack styles.

We offer a 2.5 mil epoxy powder coat finish as our standard pallet rack finish. Our epoxy finish is highly resistant to impacts, corrosion and moisture. In fact it even out performs galvanization in any environment!

All these features plus our superior 5 year limited warranty makes Eagle Lock Pallet Rack the storage rack of choice.

Beams are adjustable in two inch increments

Roll-formed beams are structurally strong and feature an integral step

Heavy-Duty Locks are replaceable, no need to replace beams due to damaged locks

Enclosed column and bracing for maximum strength and long life

High-gloss epoxy powder coat finish is impact, corrosion and moisture resistant

Five year limited warranty exceeds industry standard

# *Turn-Key Engineered Storage Solutions*

*American Warehouse Systems supplies engineered storage and distribution solutions. We provide all steps of the project including design, engineering, manufacturing and installation.*

*From shelving to pallet rack, conveyor to forklifts American Warehouse Systems is your one stop material handling solution.*

*American Warehouse Systems has provided thousands of solutions to government and corporate clients worldwide. We are capable of custom designing turn-key systems to suit any application and budget.*
