AMERICAN MEZZANINE SYSTEMS AND ANCILLARY PRODUCTS

Setting the Standard for Building Safety™

American Mezzanine Systems Custom Built to Meet Your Needs

Our Mezzanine Systems are backed by our one of a kind Lifetime Warranty. We cover materials, labor, freight, per diem, everything. If you find a problem, we will fix it, period. No one else can offer a guarantee this inclusive.

Please see our warranty certificate for complete details.

American Warehouse Systems is a GSA Prime Contractor registered with the Small Business Administration and the Federal Government Central Contractor Registration (CCR). We specialize in turnkey custom Mezzanine Systems. Our brand, American Mezzanine Systems, is designed, fabricated and installed by us to suit your specific application. Our mezzanine systems are very cost effective because we are able to market and sell them directly to you.

American Warehouse Systems produces only the highest quality mezzanine systems available on the market today. Our systems are designed by a professional engineer, and precisely manufactured using the most up to date technology available. Then, with the use of factory trained installers, we create a seamless end product in your facility, matched to suit your application.

Contact us today for additional information.

Mezzanine Design Specialists Built to Code, Built to Last

As a corporate member of the International Code Council (IBC 2003), we design all our systems to be in strict compliance with local, state and federal building codes. We also offer state sealed PE stamped drawings upon request on any project. All of this backed by the best warranty in the industry ensures you will receive the highest quality system at a very affordable price.

Customer service and quality products are the keys to our success at American Warehouse Systems.

Whatever your need, from a small storage mezzanine to a multimillion dollar distribution or warehouse system, American Warehouse Systems has a solution for you. Our clients range from small one person businesses to Fortune 500 companies and Federal Government facilities worldwide. We will use our 32 years of design experience to create a custom engineered mezzanine or warehouse system to match your application and your budget.

American Mezzanine Systems

Highest Quality Structural Steel

We use only the highest quality structural steel to fabricate American Mezzanine Systems. Our structural I-beams feature additional reinforcement for maximum strength and resistance to point loading. Our structural support columns are constructed from ASTM A500 square tubing to minimize localized deflection within the connections. Our connection system utilizes all 3/4" hardware and factory welded support clips. This unique system allows the columns to continue past the deck. This in turn allows us to fasten our all welded guardrail directly to the support columns creating an extremely strong personnel protection system.

Lighting System

Fire Suppression System

American Warehouse Systems will design and install code compliant mezzanine lighting and fire suppression systems for all mezzanines in all environments. Our mezzanine lighting systems are designed per 2003 IBC regulations and installed by licensed master electricians. Our fire suppression systems are designed and installed in accordance with the International Fire Code and NFPA. We will create our systems to meet your specific needs from standard storage to high explosive or cleanroom environments. Contact us today for additional information.

Engineered Design, Quality Materials, Best Results

American Warehouse Systems is able to offer a variety of guardrail and stair styles.

Our standard guardrail system is an all welded assembly constructed of three closed tube horizontal rails and a 4" closed tube kickplate. Two rail systems, baluster systems and woven wire mesh guardrail systems are also available.

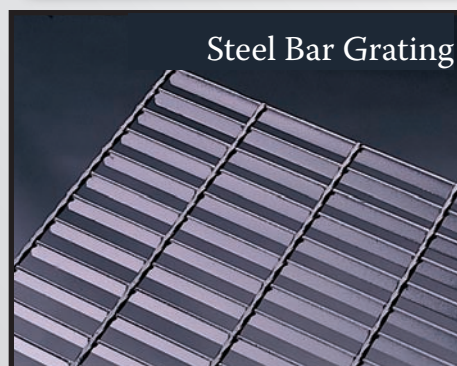

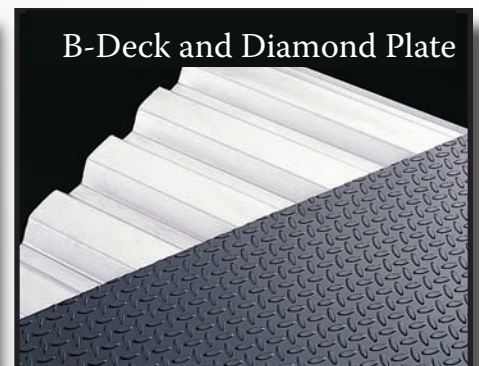

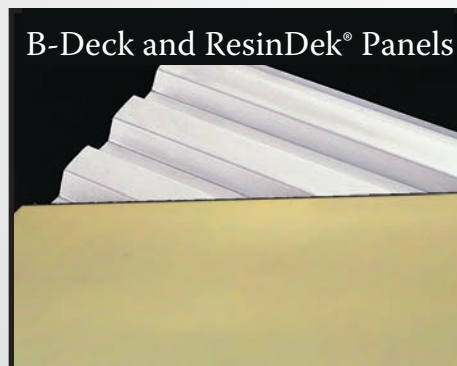

We offer double swing gates, lift out gates, sliding gates, pivot gates and corral gates to further customize our systems to meet your application.

Our standard stair is a one piece assembly factory welded and IBC 2003 compliant. OSHA stairs, exception stairs, ships ladders, caged ladders and alternating tread stairs are also available upon request.

Our standard mezzanine decks include; B-deck (corrugated steel) and ResinDek® brand mezzanine floor panels, B-deck and diamond plate steel, steel bar grating in many different weights and galvanized steel plank decking. We also offer specialized decking for specific applications. These applications include fiberglass bar grating for corrosive or wet environments, stainless steel decking for FDA approval, or concrete prep work for a seamless integration to an existing second floor.

All the many options offered allow us to truly create a custom mezzanine system, specifically designed to meet your exact requirements.

Each American Mezzanine System comes standard with a high gloss 2.5 mil epoxy powder coat finish. Our high quality epoxy finish creates a durable surface which resists chemicals and abrasions without running or blistering. Our superior mezzanine finish will out perform both wet paint and galvanization in any environment.

American Warehouse Systems Complete Systems Integration

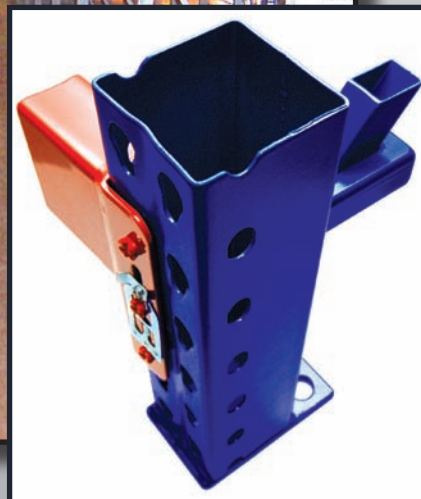

American Warehouse Systems has partnered with WireCrafters LLC to bring you the highest quality wire partitions on the market today.

The modular design of WireCrafters allows you to take standard panel sizes and create almost any configuration, from tool cribs to DEA certified enclosures to military lockers to law enforcement detention cells. The scope of products is almost limitless. Call for more details. American Warehouse Systems is the only GSA source for WireCrafters - GS-07F-6106P.

One Supplier For All Your Material Handling Needs

Our pallet rack, Eagle Lock, utilizes the same standard teardrop design that is favored by most pallet rack users, but we didn't stop there. We use a closed tube design to create a pallet rack that is 20% stronger than the competition. Eagle Lock beams are a closed tube with an integral step for any decking option. Our automatic beam locks are replaceable to avoid unwanted beam replacement due to damaged locks. Our 2.5 mil epoxy powder coat finish is highly resistant to impacts, corrosion and moisture. In fact it even out performs galvanization in any environment!

One Project, One Supplier... Seamless Design to Delivery

Material lifts and modular offices are two typical ancillary items for mezzanine systems. American Warehouse Systems can easily integrate these products to meet your specific application. Material lifts or vertical reciprocating conveyors can easily move product from the floor to mezzanine deck and back. Modular offices convert unused warehouse space into usable personnel space above or below the mezzanine deck. We design and install turnkey packages, including electrical, HVAC, fire suppression, etc.
