

WireCrafters

TA-50 Military Gear Lockers

American Warehouse Systems and WireCrafters LLC. have developed a series of gear lockers specifically for our military and government customers.

Our heavy duty lockers are constructed of 10ga. woven wire welded into a 1 $\frac{1}{4}$ " x 1 $\frac{1}{4}$ " durable steel frame. We use a 2"x2" tubular steel post to ensure rigidity and longevity of the unit in order to withstand day to day rigorous use.

Custom configurations are available to suit any application. We are also capable of options such as folding shelves, adjustable shelves, inspection hatches, raised floors etc. Contact us today for more information.

Available on GSA contract GS-07F-6106P Exclusively from:
