

# American Warehouse Systems

## GOVERNMENT MARKET BROCHURE GSA CONTRACT GS-07F-6106P

Setting the Standard for Building Safety™

# *American Warehouse Systems...*

## *... Full Service Material Handling Integrators*

**A**merican Warehouse Systems was established to provide complete warehouse solutions to clients worldwide. We understand the complications of sourcing large complex systems and the usual necessity of multiple vendors supplying pieces of the whole. At American Warehouse Systems, we follow the philosophy of *"One Project, One Vendor"*. We work with each client individually to design and implement a complete material handling system that is application specific. We are a total source provider, meaning we not only provide material handling equipment, we also supply any and all ancillary products to complement the system and all services and labor to integrate and implement the total package. Because we control all aspects of the project from design to installation we are able to provide complex projects on time and on budget.

**A**merican Warehouse Systems specializes in the design, fabrication and implementation of material handling systems for the U.S. Federal Government. Our systems can be seen in U.S. Gov. facilities worldwide.

*American Warehouse Systems is the Largest Selling GSA Supplier Specializing in the Design and Implementation of Material Handling Systems Worldwide*

**A**merican Warehouse Systems is a GSA Prime Contractor registered with the Small Business Administration and the Federal Government Central Contractor Registration (CCR). We can be found on General Service Administration Schedule 056 - Buildings and Building Materials / Industrial Services and Supplies, FSC Group 54 - Pre-Engineered / Prefabricated Buildings and Structures and FSC Group 39 - Warehouse Equipment and Supplies. Contact us today for more information 1-877-677-9066.

*American Warehouse Systems is proud to supply equipment from the following quality manufacturers on GSA Schedule 56.*

**American Warehouse Systems is a complete source material handling supplier. We provide the highest quality products supported by the most complete services on Schedule 56. Our manufacturing and integration quality has led to thousands of successful material handling projects across the globe.**

# American Mezzanine Systems Custom Built Storage Solutions

## *Industry Exclusive Lifetime Warranty*

**O**ur structural steel mezzanine systems are the most robust industrial floor systems on the market today. Our brand, American Mezzanine Systems are designed with the most demanding of military applications in mind. Structural I-beam construction with extra reinforcement means maximum strength and resistance to point loading. Our connection system utilizes all 3/4" hardware and factory welded support clips, the highest quality in the industry.

Our superior design allows our columns to continue past the decking, which in turn allows us to fasten our all welded guardrail directly to the support columns creating the industry's strongest personnel protection system. Our guardrail is an all welded system constructed of three closed horizontal rails and a 4" closed tube kickplate. We offer many varieties of access gates to further customize our systems to meet your application. Our standard stair is a one piece assembly, factory welded with diamond plate treads and risers.

**A**merican Warehouse Systems manufactures the highest quality, best value, mezzanines on the market and we back this fact with our industry exclusive, hassle free, lifetime warranty.

## *Complete GSA Packages Including Mechanical Electrical, HVAC, and Fire Suppression Services*

# Eagle Lock Pallet Rack Built Stronger to Last Longer

*20% Stronger Design plus 5 Year  
Warranty Equals Less Dollars  
Spent on Costly Rack Repairs*

**E**agle Lock pallet rack utilizes the same standard teardrop design that is favored by most pallet rack users, but we didn't stop there. We use a closed tube design throughout our system to create a pallet rack that is 20% stronger than the competition. Our beams are also a closed tube with an integral step for any decking option. Our automatic beam locks are replaceable to avoid unwanted beam replacement due to damaged locks. In addition, Eagle Lock rack is interchangeable with all major teardrop rack styles.

**W**e offer a 2.5 mil epoxy powder coat finish as our standard pallet rack finish. Our epoxy finish is highly resistant to impacts, corrosion and moisture. In fact it even out performs galvanization in any environment!

**A**ll these features plus our superior 5 year limited warranty makes Eagle Lock Pallet Rack the storage rack of choice.

**A**merican Warehouse System is capable of designing and implementing custom racking systems on GSA schedule. Our contract allows us to take any Federal Government specification and supply the exact system including all ancillary items, services and labor needed to implement in the Government facility. We are the only material handling vendor in the world with GSA capabilities this extensive.

# TA-50 Military Gear Locker Heavy Duty Versatile Design

TA-50 Military Grade Lockers are built to endure the toughest conditions the US Military has to offer. WireCrafters wire lockers can be found in thousands of US Federal Government installations worldwide. Their Gear Lockers are the number one choice of the United States Military for secure, controlled storage of personnel gear.

*American Warehouse Systems Provides  
Both Standard and Custom TA-50 Military  
Lockers on GSA Schedule GS-07F-6106P*

Built to meet the same high quality standards as all WireCrafters products, our TA-50 Military Gear Lockers offer a variety of secure storage alternatives. These lockers can be designed to the specific needs of the end user and are ideal for storing all types of military equipment – from small personal items to larger, heavier military gear.

Many options and ancillary items are available to customize our TA-50 Gear Lockers to meet any application.

*TA-50 Gear Lockers come in all shapes and sizes. No matter what your specific needs may be, we can manufacture a locker to store and protect it. Locker options include, sliding, hinge and bi-fold doors, standard shelves, folding shelves and wire shelves, hangbars, helmet inspection hatches, redundant locking systems, and more...*

# WireCrafters

# WireCrafters Wire Partitions Military Grade Enclosures

American Warehouse Systems has allied with WireCrafters LLC to bring you the highest quality wire partitions on the market today. The modular design of WireCrafters allows you to take standard panel sizes and create almost any configuration, from tool cribs to DEA certified enclosures to military lockers to law enforcement detention cells. The scope of products is almost limitless.

## Woven Wire Partitions

Modular design, strong and secure; WireCrafters partitions are the best in the industry. 10 ga. wire in welded frames, 2x2 posts and the heaviest assembly hardware in the industry make us the obvious choice. Stock sizes are available to ship within 48 hours ARO!

## Secure Mezzanine Storage

Secure the underside or top of your American Warehouse Systems mezzanine with WireCrafters woven wire partitions. The combined engineering efforts of our companies ensure a perfect fit.

## Pallet Rack Enclosures

# Complete Conveyor Solutions Custom Engineered Systems

American Warehouse Systems is the only authorized GSA supplier of Hytrol brand conveyor. Hytrol has grown to be one of the largest conveyor manufacturers in the world through innovative design, competitive pricing and excellent product availability. Through our partnership with Hytrol, American Warehouse Systems has integrated conveyor systems into government facilities throughout the globe.

Whatever the application, American Warehouse Systems has the experience and resources to complete any conveyor project on schedule and on budget. "One Project, One Vendor" is the philosophy that has made American Warehouse Systems the leader in U.S. Federal Government conveyor systems.

# Western Pacific Shelving RiveTier, Pacific and Deluxe

**W**estern Pacific Storage Solutions has produced quality storage products for more than 2 decades. American Warehouse Systems is proud to be the exclusive GSA supplier of the WPSS product line. We supply RiveTier boltless shelving, Pacific compression clip shelving and

Deluxe box and high rise shelving. The versatility of these three products is unmatched allowing us to configure storage systems for any hand load application. The superior engineering of WPSS also provides for multi-level mezzanine systems and shelving catwalks. All this available on our GSA contract along with complete mechanical installation to provide a total storage system.

# Strong Hold Products Cabinets and Workbenches

**S**trong Hold Products manufactures the highest quality industrial cabinets and workbenches on the market. Strong Hold Products are all welded construction utilizing only the heaviest gauge steel in fabrication. American Warehouse Systems is the exclusive GSA contract holder for all Strong Hold Products. We are able to offer the complete product line on GS-07F-6106P including any custom fabrication to exactly match end-user specifications. Strong Hold offers many options for storage cabinets and workbenches in order to provide custom products to fit each individual application.

# Other Products Available from American Warehouse Systems

**V**ertical Reciprocating Conveyors (VRC) also known as material lifts are a very efficient way to move materials vertically within a material handling system. VRC's are commonly used to elevate materials from a warehouse floor to a mezzanine deck or between permanent floors within a facility. The lifts are commonly electric powered utilizing either a hydraulic or mechanical drive to raise and lower the platform inside a secured enclosure. Material lifts can be configured for many products having a great flexibility on platform dimensions and weight capacities.

**M**odular offices can easily convert unused warehouse space into usable office space. Modular offices can also be manufactured into exterior buildings for use as guard shacks or additional office buildings. American Warehouse Systems designs and installs turn-key modular office packages, including electrical, HVAC, fire suppression, data and communication ports. We can further integrate our modular offices with our other quality products such as mezzanine systems to create a turn-key system to meet your specific application.

**M**obile aisle shelving systems combine the benefits of high-density storage with the flexibility of steel shelving, modular drawers and bulk rack. By reducing the number of access aisles you can save as much as 50% of your floor space. Aisles can be set at any number of widths, carriages can be custom designed to virtually any size and the shelving can be configured to suit your needs. American Warehouse Systems provides both mechanical and power assist systems on GSA Schedule.

**A**merican Warehouse Systems provides innovation and perspectives in productivity and inventory control with Automated Storage and Retrieval Systems such as vertical carousels and vertical lift modules. Carousels and VLM's offer extremely high-density storage by utilizing the air space above the floor and containing the product in a very small footprint. This in turn increases productivity, inventory security and inventory control. Ergonomics are improved with product delivery at the same optimized ergonomic height.

# Design and Installation Service Complete Seamless Integration

*American Warehouse Systems provides the following services on GS-07F-6106P.*

**Structural Design**  
**Seismic and Geotechnical Research**  
**Computer Assisted Drafting (CAD)**  
**Systems Integration**  
**Safety Inspections**  
**Field Measurements / Site Survey**

**Mechanical Installation**  
**Electrical Installation**  
**Plumbing Installation**  
**HVAC Installation**  
**Concrete Installation**  
**International Shipping / Packaging**

## **Design / Pre-Fabrication Services**

American Warehouse Systems has the capabilities on GSA schedule to take any government provided specification and turn it into a real world system. Our complete offering of design and integration services translate to custom engineered material handling systems available to all Federal Agencies on GS-07F-6106P.

## **On site / Surveys and Inspections**

Our material handling systems are all custom designed to meet the specific needs of the client agency. As such it is imperative we understand the receiving facility. American Warehouse Systems offers a full range of on site services to ensure the new material handling system will integrate with the client's building.

## **International Logistics / Shipping**

American Warehouse Systems will ship your GSA procured material handling system anywhere you might need it. Our professional logistics team will research the best value shipping methods to the receiving government facility then follow through to ensure trucks / containers are loaded and braced correctly so everything arrives in top condition.

## **Installation / Implementation Services**

Our GSA contract contains virtually every trade service necessary to install and implement a material handling system. First, we provide full mechanical installation of all our products. We don't stop there however. We also provide full electrical, plumbing (usually in the form of fire suppression), HVAC and concrete services in addition to standard equipment installation. With the complete range of installation services we provide, no material handling scope of work is outside our GSA contract capability.
